In regards to: MB Docket No. 04-233

FCC
445 12th Street SW
Washington, DC 20554

Dear FCC,

I'm a K-Love radio listener from the greater area of San Antonio, TX and its come to my attention that the FCC is proposing to expand the Lower Power FM (LPFM) stations within my broadcast area 91.3, 106.3 and 92.1. I strongly object this proposal because it will give the new LPFM stations priority over the current FM translator service and perhaps force K-Love radio off the air.

K-Love radio station is a great inspiration to my local community giving us an alternative Christian music program from the ones currently on the air. If K-Love were to be displaced from my community and surrounding areas the FCC would receive thousands of complaints possibly a law suite.

K-Love radio provides the public a positive and encouraging message that benefits everyone who listens.

Sincerely,

Dennis L Perez
